In Hungary around 8 % of students attend special education compared to 2.5-3 percent constant rate in the European Union. The Roma are overrepresented in the mildly handicapped category hence the number of mildly handicapped is much higher in Hungary than in other countries. The main reasons are the financial incentives (the state provide double support for the schools), the culturally biased assessment tools and the prejudices of the teachers and expert panel. This project direct aim is to influence this system and to prove that a big proportion of Roma children are unreasonably placed to special education. Members of expert committees, teachers, and decision makers will be invited in the camp and they can see the project implementation.

Hungary	HU 061	Chance for Children Foundation	Integration Becomes Reality: Joint legal and community actions in Hajdúhadház and Kaposvár	01.07.2011	31.12.2011	12,617	The objective of the project is twofold: 1. to end segregation in schools in Kaposvár and Hajdúhadház (both inter and intra-school segregation) and 2. to create a precedent in Hungarian jurisprudence on school desegregation by submitting a school desegregation plan with the claim, which specifically outlines what the local government is supposed to do to end segregation. This move will test the mandate that the Supreme Court spelled out in its December decision in Kaposvár according to which a public interest foundation within an actio popularis action can legitimately demand the ending of an illegal situation in a specific manner and will satisfy the requirement also spelled out in this Supreme Court decision which said that if a "realistic, straightforward and manageable" desegregation plan is submitted with the claim, the court can order the local government to execute the plan and in that way end the illegal situation of segregation. The detailed, well-researched plan makes it possible to realise a desegregation which takes into account local specificities and possible outcomes. The 2010 Supreme Court decision gives a unique opportunity to translate court decisions to actions and reality and CFCF does not want to miss this opportunity.
